Ready to put your career in overdrive?

We're looking for passionate changemakers to join our global organization to deliver transformational IT and security management solutions

BE YOUR BEST AT KASEYA

Kaseya® is the leading global provider of complete IT Management Solutions for managed service providers (MSPs) and internal IT organizations. Through its open platform and customer-centric approach, Kaseya delivers best in breed technologies that allow organizations to efficiently manage, secure, and backup IT. Join the company with the industry's most comprehensive, integrated IT management platform that empowers businesses to be more efficient, profitable, and successful.

We are looking for **Software Development Engineers** to join Kaseya's global R&D team. Are you an up-and-coming graduate with a solid computer science background looking to join a fast-growing company? Do you have a deep passion for accountability, customer success and technical excellence? If so, there's no better place than Kaseya to build your career.

WHAT TO EXPECT

→ Exposure to all aspects of the Software Development Lifecycle from inception to running your code in production environments for new and existing applications.

→ You'll be part of an agile development team, working with software development professionals, where you will build Kaseya's latest and greatest applications.

→ You will receive guidance and mentorship in multiple disciplines of software engineering, while following established practices and procedures.

APPLY NOW!

kaseya.com/careers

GLOBAL REACH

Kaseya has offices around the world providing you with a truly global career with unlimited potential.

SUCCESSFUL
candidates will have...

- Knowledge of the Software Development Life Cycle process.
- Understanding of computer science fundamentals (e.g., algorithms, data structures, design patterns, networking, operating systems).
- Proficiency in one or more programming languages.
- Bachelor's or Master's degree in Computer Science degree or an equivalent field.

"

Nicholas Gomez

Software Development Engineer

"The culture in R&D is great. Our team members here are passionate and knowledgeable, and we're all working on different things. It's really fun to just sample knowledge from each other and talk about different approaches and techniques.

"
